Business Philosophy

I concentrate on the financial and investment needs of high-net-worth individuals, small businesses and retired clients. I stress a long-term approach to investing and emphasize financial planning to help my clients determine their financial need and risk tolerance. However, I accommodate investors for whom a short-term speculative investment approach may be appropriate. Portfolio performance and client satisfaction are my primary business objectives. I am committed to providing a high level customer service to all my clients. 158

Business Philosophy

Our team concentrates on the financial and investment needs of high-net-worth individuals and small businesses by helping our clients develop strategies to manage their personal and corporate finances. We stress a long-term approach to investing and emphasize financial planning to help our clients determine their financial needs and risk tolerance. However, we accommodate investors for whom a short-term speculative investment approach may be appropriate. Portfolio performance and client satisfaction are our primary business objectives. We differentiate ourselves by providing exceptional customer service to our clients.
